SUMMARY

Aspiring Computer Science Engineer seeking a full-time Software Engineer position. Equipped with a solid foundation in software development, strong analytical skills, and a structured approach to problem-solving. Eager to leverage technical expertise, collaboration, and innovative thinking to contribute to impactful software solutions in a dynamic organization.

EDUCATION

Bachelor of Technology in Computer Science and Engineering | 2026 | CGPA: 7.33/10

Amity University, Noida

CBSE XII | 2022 | 83.98%

Delhi Public School

CBSE X | 2020 | 72.96%

Delhi Public School

TECHNICAL SKILLS

Programming Languages: Java, Python

Web Development: HTML5, CSS, JavaScript, Tailwind CSS, React.js, Node.js, Socket.IO

Databases: SQL, MongoDB, MongoDB Atlas

Cloud/DevOps: AWS (EC2, Lambda, S3, RDS, VPC, IAM), Docker, MongoDB Atlas

Version Control: Git, GitHub

AI/ML & GenAI: TensorFlow, PyTorch, ML, DL, Transformers, LangChain, Prompt Engineering, RAG, LangGraph

Developer Tools: VS Code, IntelliJ IDEA, Jupyter Notebook, Google Anti-Gravity, Linux

Core Concepts: Object-Oriented Programming, Operating Systems

AI Tools: ChatGPT, Gemini, Claude, Cursor, Blackbox, Codex, Google AI Studio

WORK EXPERIENCE

MERN Stack Developer Summer Intern, SmartBridge | May – July 2025

Technologies Used: HTML5, Tailwind CSS, JavaScript, React, Node.js, MongoDB, Socket.IO

- Created a real-time chat application that supports user communication with low-latency message delivery < 100 ms.
- Implemented secure authentication and storage system, reducing data access latency by 25% and improving application performance.

Game Developer Summer Intern, Jabsz Gaming Studios LLP | May – July 2025

Technologies Used: HTML5, Tailwind CSS, JavaScript, React, Godot

- Developed 'Time Rewind' game, increasing user engagement by 30% through optimized gameplay mechanics and smooth transitions.
- Enhanced gameplay responsiveness by 25% through optimized game logic and efficient state management.

PROJECTS

Team Task Manager | Full-Stack Project | March–April 2026

- Developed a centralized team collaboration platform that streamlines project organization, task assignment, progress tracking, and member management, reducing communication gaps and improving team productivity.
- Implemented secure role-based access, real-time project visibility, dashboard analytics, task prioritization, and status tracking, enabling teams to efficiently monitor workflows and ensure timely project completion.

Weatherly | Hybrid Deep Learning Weather Forecasting System | January–March 2026

Technologies Used: Python, TensorFlow/Keras, Streamlit, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, SciPy, Statsmodels

- Designed the architecture with 2 LSTM (64-unit) and 2 GRU (64-unit) layers, trained over 50 epochs, achieving RMSE of 1.23 and MAE of 0.89 with enhanced predictive reliability through Random Forest-based auto-stopping optimization.
- Integrated an AI-based assistant to generate simplified, non-numerical weather insights.

Team Collaboration Workspace | February – December 2025

Technologies Used: HTML5, Tailwind CSS, JavaScript, Node.js, Express.js, Socket.IO, MongoDB

- Supported concurrent multi-user editing with low-latency updates using Socket.IO-based real-time synchronization.
- Built a scalable backend architecture with RESTful APIs and MongoDB integration for efficient data storage and retrieval.

PUBLICATIONS

A Novice Approach to Weather Forecasting Using Hybrid Predictive Methodologies in Machine Learning, presented at an IEEE Conference at NIT Delhi.

CERTIFICATIONS

Design Thinking: A Primer | NPTEL, IIT Madras | January – February 2024

Joy Computing Using Python | NPTEL, IIT Ropar | July – October 2024

AWS Academy Graduate | AWS Academy Cloud Foundations | January 2025

MongoDB Node.js Developer Path | MongoDB (SmartBridge) | June 2025

Training in CRUD operations, aggregation, transactions, indexing, Atlas, data modeling, and Node.js integration.
